

Synthetic Grass Cleaner, Deodoriser and Pet Premium Infill

Product Specification Sheet

SGNCC Synthetic Turf Concentrate / Bio Enzymatic Spray + concentrate

Sgncc Synthetic Turf Concentrate is a unique and powerful bio-chemical solution to quickly and easily remove organic matter from synthetic turf and porous surfaces.

Sgncc Synthetic Turf Concentrate will penetrate the surface, travel through the material and into the substrate. The solution will follow the path of the animal urine then degrade uric crystals and organic matter until it's eliminated!
\$110.00 180m² coverage

SGNCC Pet Premium Organic Turf Infill

Our exclusive Pet Premium Infill consists of naturally occurring minerals known as Zeolites, designed to absorb animal urine. This absorption prevents the release of ammonia gas and significantly reduces unpleasant odours.

The water vapour is then released back through the turf yarn having a cooling effect on the turf surface by up to 15c.

Product of Australia.

Safe for Pets and Children.

100% organic, certified by Australian organic Limited.
\$33.00 15kg
